International Relations of the Middle East: Conflict and Instability from WWI to the 21st Century

FA 14

Evaluations are completed online on a voluntary basis when students check their grades at the end of each academic term. The completion rate for the evaluation was 50 percent. This completion rate indicates that the results are marginally reliable. Students respond to a series of seventeen questions assessing their professor and the quality of instruction provided. Overall my scores exceeded UNG faculty averages. The difficulty of the class was perceived to be above average. The modal grade awarded was a B. The average score was an 81.
